

OMNIA
Food retail solutions

ROCAM

What does it mean to put yourself in the game? The answer is in the pride of being able to celebrate the milestone of half a century of activity. Since 1974 a small craft enterprise has been able to build, reinvent and renew itself until today in which we can proudly say that it is a reference player in the world market of HO.RE.CA. Our work celebrates and evolves the entrepreneurial spirit that founded this company every day. In Rocam we do not see the half century as a milestone but as a new starting point to be more competitive and at the forefront. With passion and dedication we create excellence to give value to your projects.

Rocam offers you a customized consulting and design service to meet your needs. We study and develop with you the best solutions for the layout and arrangement of canteens, restaurants and self-service from your project.

Our products are made with the most advanced technologies and materials but retain the charm of a handmade workmanship.

Each item is the result of a careful design that combines innovation with functionality and design. In addition, each item is subject to strict controls and can be customized from a wide range of wood colors. The result is a unique and high-level object, with unmistakably Italian style.

PRESENTATION IS EVERYTHING

One of the most important aspects in the food retail sector is to be able to offer every time a presentation that enhances the foods: thanks to the OMNIA model configured with G6 showcase, this goal is always achieved. Complete panelling in the front of the line and high steel bases contribute to create comfortable environments with a high aesthetic value.

OMNIA - THE SOLUTION FOR YOU

Customize your space by choosing from our wide range of combinable modules to offer your customers the best possible service.

The neutral OMNIA counters, equipped with warm tops and G5 bulkheads, allow you to cater even small shops, rotisseries and all those activities that require fast and efficient services. The hot and ventilated reserve of SC modules helps to increase the efficiency of the service.

CASE STUDY

The local fish market "Mare nostro" is simple but furnished with style and functionality. The equipment is adapted to the different requirements of the customer's requested activity at Matarrese srl.

We designed a solution to equip the area of the restaurant, with benches suitable for the double functionality of the room, or self service during the day and trattoria in the evening. Thanks to the choice of hot and cold benches, equipped with wheels, the staff can move them easily facilitating service.

So we provided a hot dry bench (2), a hot bath bench (1) and a refrigerated bench (3) to allow the proposal of hot dishes for takeaway or consumption on site.
