

PULSAR

The power of InfraRed.

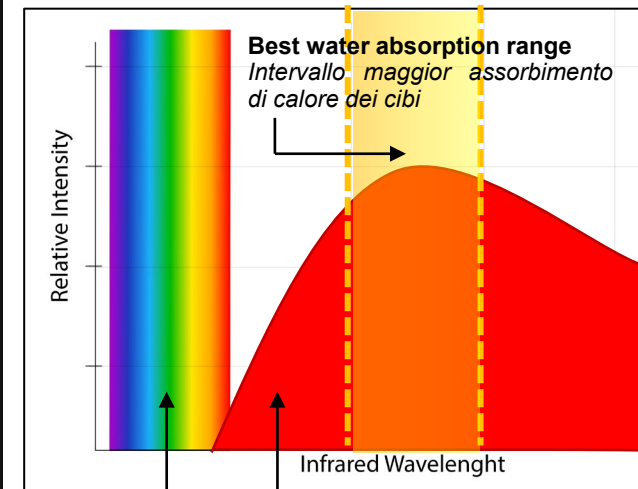

The new strip heater by ROCAM.
 Il nuovo riscaldante ad infrarossi by ROCAM.

EN

PULSAR is a heating element that combines efficiency and discreet desing. Thanks to its calrod heating elements the generated long-wave infrareds have low reflectivity and are able to heat a specific area in a very short period of time, concentrating all the radiant energy on food, with a better guaranteed thermal maintenance.

IT

PULSAR è un elemento riscaldante che basa la propria essenza sull'efficienza energetica nel rapporto consumi-energia prodotta. Grazie alle resistenze corazzate gli infrarossi ad onda lunga prodotti hanno una bassa riflettività e riescono a riscaldare in poco tempo un'area definita, concentrando tutta l'energia radiante sul cibo, con un miglior mantenimento termico garantito.

PULSAR	Model	Voltage (50/60 Hz)	Dimensions – dimensioni (mm)	Power/potenza (Watt)
	Pulsar 600	230 V		500 W
	Pulsar 820	230 V		750 W
	Pulsar 1150	230 V		1000 W
	Pulsar 1480	230 V		1400 W
	Pulsar 1800	230 V		1750 W

EN

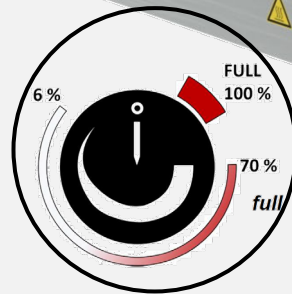

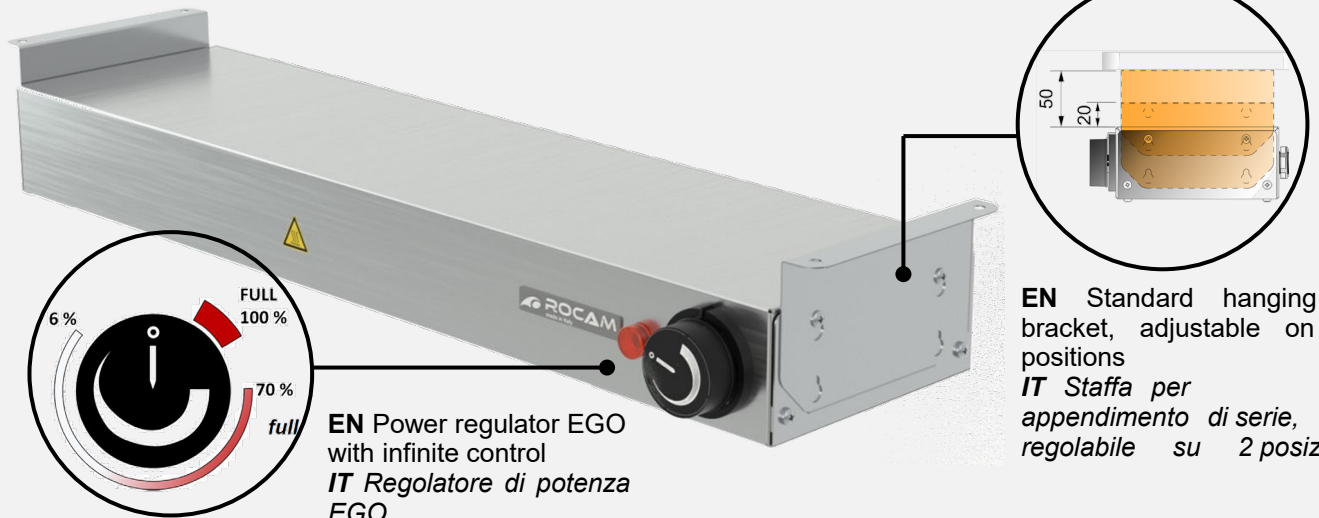

The **heating element PULSAR** is available in various sizes, to adapt to all environments: 600, 820, 1150, 1480, 1800.

The product is supplied as standard with two brackets to be hooked under the pass and can be adjusted through the slots in two different positions with a total excursion of 30mm.

IT

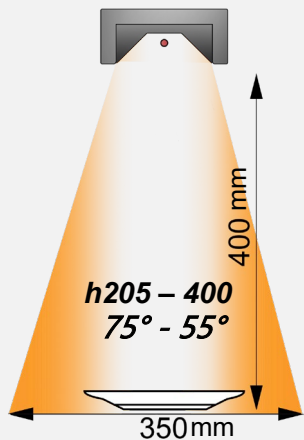

L'elemento riscaldante PULSAR è disponibile in varie misure, per adattarsi a tutti gli ambienti: 600, 820, 1150, 1480, 1800.

Il prodotto viene fornito di serie con due staffe per essere agganciate al di sotto del pass e può essere regolato tramite le asole in due differenti posizioni con un'escursione totale di 30mm.

EN Power regulator EGO with infinite control
